Official Reserve Assets

(end-of-period)

Official reserve assets grew as a result of an increase of LTL 958 million in deposits of the central government with the Bank of Lithuania. The reserve assets were also pushed up by an increase of LTL 89.7 million in external liabilities of the Bank of Lithuania and a rise of LTL 30.2 million in other factors. A slower growth of official reserve assets was determined by a contraction of LTL 107.2 million in the deposits of other financial institutions with the Bank of Lithuania and a decline of LTL 75.5 million in currency in circulation.
