Independent auditors' report to the Seimas of the Republic of Lithuania

We have audited the accompanying financial statements of the Bank of Lithuania (hereinafter "the Bank"), which comprise the balance sheet as at 31 December 2010, the statement of income for the year then ended, and notes (comprising a summary of significant accounting policies and other explanatory information).

Management's Responsibility for the Financial Statements

The Bank's management is responsible for the preparation and fair presentation of these financial statements in accordance with the accounting principles adopted by the Bank of Lithuania, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing as set forth by the International Federation of Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

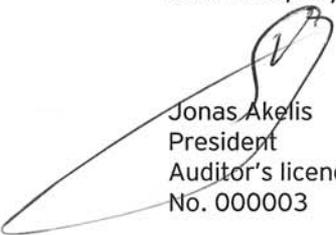

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Bank's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Bank of Lithuania as at 31 December 2010, and its financial performance for the year then ended in accordance with the accounting principles adopted by the Bank of Lithuania.

The Annual Financial Statements 2010 of the Bank of Lithuania were approved on 15 March 2011 by Resolution No. 03-36 of the Board of the Bank of Lithuania.

Chairman of the Board

Reinoldijus Šarkinas

EXPLANATORY NOTES TO THE ANNUAL FINANCIAL STATEMENTS OF THE BANK OF LITHUANIA

FUNCTIONS OF THE BANK OF LITHUANIA

The Bank of Lithuania shall perform the following functions:

- issue the currency of the Republic of Lithuania;
- formulate and implement monetary policy;
- determine the litas exchange rate regulation system and announce the official exchange rate of the litas;
- manage, use and dispose of the foreign reserves of the Bank of Lithuania;
- act as a State Treasury agent;
- in the manner and cases established by laws and other legal acts, issue and revoke licenses of credit institutions and payment institutions of the Republic of Lithuania as well as branches of credit institutions of foreign states, and supervise the activities thereof; it shall also perform other functions related to the activities of credit institutions and payment institutions established by laws;
- establish principles and procedures for financial accounting and reporting of credit institutions and payment institutions of the Republic of Lithuania and branches of credit institutions of foreign states operating in the Republic of Lithuania;
- encourage sound and efficient operation of payment and securities settlement systems;
- collect monetary, banking and balance of payments statistics, as well as the data of financial and related statistics of the Republic of Lithuania, implement standards on the collection, reporting and dissemination of the said statistics and compile the Balance of Payments of the Republic of Lithuania.

After Lithuania's accession to the European Union (EU) on 1 May 2004, the Bank of Lithuania became a part of the European System of Central Banks (ESCB). Lithuania has been participating in the Exchange Rate Mechanism II from 28 June 2004.

BASIS FOR PREPARATION AND PRESENTATION OF THE ANNUAL FINANCIAL STATEMENTS

The financial accounting of the Bank of Lithuania is managed and the Annual Financial Statements are prepared in accordance with the Law on the Bank of Lithuania, other legislation of the Republic of Lithuania applicable to the Bank of Lithuania and the Accounting Policy approved by the Board of the Bank of Lithuania, which is in line with the accounting and financial reporting guidelines established by the European Central Bank (ECB) to the extent that such requirements are applicable to a national central bank of the Member State which has not yet adopted the euro. If a specific accounting treatment is not laid down in the Accounting Policy of the Bank of Lithuania and in the absence of the decisions and instructions to the contrary by the ECB, the Bank of Lithuania shall follow the principles of the international accounting and financial reporting standards as adopted by the European Union relevant to the activities and accounts of the Bank of Lithuania.

Following the principles of consistency and comparability, the respective comparable financial data for 2009 have been presented.

Due to rounding, the totals included in the Balance Sheet, Profit and Loss Account and Notes of the Bank of Lithuania may not equal the sum of the individual figures.

ACCOUNTING POLICY

GENERAL PRINCIPLES

In managing financial accounting and drawing up the financial statements, the Bank of Lithuania follows the following general accounting principles: economic reality and transparency, prudence, materiality, going concern, accrual, consistency and comparability.

Gold, debt securities (other than those classified as held-to-maturity) and other on-balance-sheet and off-balance-sheet foreign reserves assets and liabilities (hereinafter – financial items) denominated in foreign currency are recorded in financial accounting at acquisition cost (transaction) price, and in the Annual Financial Statements are presented at market price and official exchange rate¹ of the balance sheet date.

Results arising from revaluation of gold holding, foreign currency (on a currency-by-currency basis), securities (on a code-by-code basis, i.e. same ISIN number) and interest rate futures and forward transactions in securities (on an item-by-item basis) are accounted for separately.

Unrealised revaluation loss arising at the end of the financial year from revaluation of a separate financial item at market price and official exchange rate and exceeding previous unrealised revaluation gain registered in corresponding revaluation account, is recognised as expense of the current financial year. Unrealised loss taken to Profit and Loss Account cannot be reversed in subsequent years against new revaluation gain of the same financial item resulting from changes in market price and official exchange rate or offset by the revaluation gain of another type of the financial item.

Unrealised revaluation gain arising at the end of the financial year from the revaluation of a separate financial item at market price and official exchange rate is presented at revaluation accounts.

The average rate and average price method is used in order to compute the acquisition costs for gold, securities and foreign currency. Such acquisition costs are used for the purpose of calculating the realised and unrealised results.

Income and expense are recognised in the accounting period in which they are earned or incurred and not in the period in which they are received or paid.

GOLD

Gold holdings are revalued on the last business day of each month on the basis of the gold market price in US dollars per one Troy ounce. This price is converted into litas at the official exchange rate of the litas against the US dollar on the revaluation day.

No distinction is made between the gold market price and US dollar revaluation differences for gold, but a single gold revaluation gain or loss is recorded in the gold revaluation account.

In the event of recognition of unrealised revaluation loss on gold at year-end, the average cost of gold is correspondingly adjusted to the gold market price and US dollar exchange rate prevailing on the last business day of the financial year.

Transactions related to gold swaps are accounted for in the same way as repurchase agreements.

¹ Official exchange rate is the official exchange rate of the litas against the euro or exchange rate of the litas against foreign currency determined by the Bank of Lithuania.

FOREIGN CURRENCY

Financial items denominated in foreign currency are revalued on each business day at the official exchange rate prevailing on that day.

Official exchange rates of the litas against major foreign currencies determined by the Bank of Lithuania

Litas (LTL) per unit

Currency	Code	31 December 2010	31 December 2009
Euro	EUR	3.4528	3.4528
US dollar	USD	2.6099	2.4052
100 Japanese yen	JPY	3.2024	2.6108
Special Drawing Rights	XDR	4.0015	3.7745

The average rate of foreign currency is recalculated on a daily basis in case of an increase of a respective foreign currency position.

In the event of recognition of unrealised revaluation loss on a separate foreign currency at year-end, the average rate of that currency is correspondingly adjusted to the official exchange rate on the last business day of the financial year.

FOREIGN EXCHANGE TRANSACTIONS

Foreign currency to be received or paid according to foreign exchange spot, forward and swap transactions influences a respective foreign currency position on a trade date and is recorded in off-balance-sheet accounts from the trade date to the settlement date.

The difference in the value at the spot and forward rates of the transaction is recognised as interest income or expense and is accrued on a daily basis over the remaining duration of the transaction.

SECURITIES

Securities are recorded in the on-balance-sheet accounts at cost on the transaction settlement date.

The revaluation of securities (other than those classified as held-to-maturity) is performed on the last business day of each month at mid-market prices prevailing at the revaluation date. Revaluation results of securities related with changes of the market price of securities and the official exchange rate of the foreign currency are accounted for in separate revaluation accounts.

Securities classified as held-to-maturity are accounted at cost subject to impairment and any premiums or discounts are amortised.

The average price of each issue of securities is recalculated at the end of the business day in consideration of all purchases of the same issue of securities made during the day and their average acquisition costs. Realised gain (loss) for the same day sales of these securities is calculated according to this new average cost.

Coupon purchased together with security is presented in a separate balance sheet item as other assets and is not included in the acquisition cost of the security.

The difference between the security acquisition cost and its nominal value – discount or premium – is recognised as income or expense according to the straight-line method on a daily

basis from the settlement date of purchase transaction to the maturity date or settlement date of sale transaction.

Discount on non-coupon bearing securities is amortized according to the Internal Rate of Return (IRR) method and discount or premium on coupon bearing securities is amortized according to the straight-line method.

If at the end of the financial year unrealised revaluation loss on valuation of a separate type of securities is recognised as expense, the average cost of such type of securities is adjusted according to its market price prevailing on the last business day of the financial year.

FORWARD TRANSACTIONS IN SECURITIES

Forward purchases or sales of securities are recognised in off-balance-sheet accounts from the trade date to the settlement date at the forward price of the transaction. Securities to be purchased or sold under these transactions are revalued on the last business day of each month at forward market price. The revaluation result on these securities is recorded for separately on item-by-item basis in on-balance-sheet assets or liabilities accounts.

On the settlement date of forward transactions in securities, purchases or sales of the securities are recorded on the on-balance-sheet accounts at the actual market price, and the difference between this price and the forward price of the transaction is recognised as realised income or expense.

EQUITY INSTRUMENTS

Long-term investments into equity instruments held for the Bank's specific purposes are investments into equities in order to participate in the activities of a specific enterprise whose equity instruments are non-marketable and their price is not quoted in the market. They are recorded at cost.

REVERSE TRANSACTIONS

A repurchase agreement is recorded as collateralised inward deposit: the commitment to repay funds is recorded on the liabilities side of the balance sheet, while the financial asset that has been given as collateral (sold and repurchased under this agreement) remains on the asset side of the balance sheet for the period of the transaction.

A reverse repurchase agreement is recorded as a collateralised outward loan on the asset side of the balance sheet. The collateral acquired during the transaction period is not reported in the balance sheet and is not revalued.

The difference between the purchase and repurchase price of the collateral acquired under repurchase and reverse repurchase agreements is recognised on a daily basis as interest income or expense over remaining duration of the transaction.

INTEREST RATE FUTURES

Interest rate futures are recorded in off-balance-sheet accounts at nominal value of contracts from the trade date to the closing or maturity date. Daily changes in the variation margins of interest rate futures are recognised as realised income or expense.

TANGIBLE AND INTANGIBLE FIXED ASSETS

Tangible fixed assets include such tangible items whose acquisition cost (including VAT) is not less than LTL 500 and whose useful life is longer than one year. The Museum stocks, pieces of art and tangible assets included into the list of historical and art valuables are also treated as tangible assets with no regard to their acquisition cost. Intangible assets include items without physical substance whose useful life is not less than one year. Tangible and intangible fixed assets are recorded in the balance sheet at cost less accumulated depreciation (amortisation). Depreciation (amortisation) is calculated on a straight-line basis over the estimated useful life of the asset.

Depreciation (amortisation) rates of tangible and intangible fixed assets

Assets	Annual rate, %
Tangible fixed assets	
Buildings and structures	2.5–10
Cash count and computer equipment	10–50
Vehicles	20
Furniture, office equipment and other fixed assets	5–50
Intangible assets	25–100

If there are signs of significant decline in the market value of real estate, then at the end of the financial year the acquisition cost of such assets is reduced by the amount of impairment loss.

BANKNOTES AND COINS IN CIRCULATION

Banknotes and coins in circulation are presented at nominal value as liabilities in the balance sheet. The cost of printing of banknotes and minting coins, as well as other expenses associated with the issue of the national currency into circulation, are recorded as expenses when incurred, irrespective of when the coins and banknotes were put into circulation.

RECOGNITION OF INCOME AND EXPENSES

Interest income and expense related to financial items denominated in foreign currency (including premiums and discounts of securities) are calculated and booked daily.

Realised gain and loss arising from financial items denominated in foreign currency are taken to the Profit and Loss Account on the trade date, except for the realised gain and loss on securities which are recognised on the settlement date.

Unrealised revaluation gain is not recognised as income and is presented in revaluation accounts. Unrealised revaluation loss is taken to the Profit and Loss Account at year-end, if it exceeds previous revaluation gain related to the corresponding financial item.

Interest income and expense related to financial assets and liabilities denominated in litas are booked monthly, other income and expenses of the year denominated in litas – till year-end.

POST-BALANCE SHEET EVENTS

Annual Financial Statements are adjusted for post-balance sheet events that occur between the balance sheet date and the date on which the Annual Financial Statements are approved by the Board of the Bank of Lithuania, if those events provide evidence of conditions that existed on balance sheet date and therefore that amounts reported in the Annual Financial Statements have to be adjusted.

No adjustment is made for the data of the Annual Financial Statements of post-balance sheet events that are indicative of conditions that arose after the balance sheet date. Events which are of such importance that their non-disclosure could influence the economic decisions of users taken on the basis of the Annual Financial Statements are disclosed in Explanatory Notes to the Annual Financial Statements.

FINANCIAL RISK AND ITS MANAGEMENT

The main object of the financial risk of the Bank of Lithuania is foreign reserves that as at 31 December 2010 accounted for 98 per cent of the total assets of the Bank of Lithuania.

In managing foreign reserves the Bank of Lithuania is exposed to different types of financial risk such as market, credit, liquidity and settlement risk. These risks are managed by an established system of limits for risk exposures and other means aimed at reducing risks.

The main risk faced by the Bank of Lithuania in foreign reserve management that has the strongest influence on financial results is market risk. Market risk comprises exchange rate, gold price and interest rate risk.

Exchange rate risk has been mainly eliminated – practically all foreign reserves not related to liabilities in foreign currencies are invested in the anchor currency – the euro. The part of foreign reserves corresponding to liabilities is invested in the currency of the liabilities (see Note 28).

The Bank of Lithuania uses the indicator of the modified duration (MD)² as the main tool for managing interest rate risk. Interest rate risk is managed by setting benchmarks to each portfolio of foreign reserves, its MD and largest allowed deviations of portfolio real investment MD from the MD of the benchmarks. In 2010 the part of foreign reserves not exceeding the amount of the capital of the Bank of Lithuania was invested into foreign governments' securities classified as held-to-maturity. The average MD of foreign reserve investments (other than those classified as held-to-maturity) was 0.85 in 2010 (1.33 in 2009).

Market risk is valued applying "value-at-risk" (VaR) indicator. At the end of 2010 VaR indicator for market risk was EUR 3.9 million³ (EUR 3.9 million in 2009), for gold price and exchange rate risk VaR indicator was EUR 3.2 million (EUR 2.5 million in 2009), for interest rate risk VaR indicator was EUR 2.5 million, same as in the previous year.

For the purpose of managing exchange rate risk and interest rate risk, the Bank of Lithuania also uses financial derivatives (see Note 17). All financial derivatives are included in the measurement of the foreign reserves investment market and credit risk.

Credit risk is managed by establishing strict financial reliability requirements to issuers and counterparties. In order to reduce credit risk, limits of the liabilities to the Bank of Lithuania are established for issuers, counterparties and their groups.

Liquidity risk is managed by setting liquidity ratios and a minimum amount of highly liquid financial instruments in foreign reserves.

Various correspondent account management instruments are applied for managing settlement risks: the delivery-versus-payment principle, matching of debt and credit turnovers, ISDA Master Agreement. These measures facilitate the reduction of the risk of loss due to settlement defaults by counterparties.

² MD shows approximately how much will the percentage value of an investment change, if the profitability rates increase by 100 basis points.

³ The indicator is calculated using parametric approach based on RiskMetrics methodology. It shows a probability of 95% that adverse developments of gold price, exchange rates or interest rate will not reduce the investment value during the next business day by the amount exceeding the value of the indicator. Data and calculations provided in the section "Financial Risk and Its Management" are prepared by the Market Operations Department of the Bank of Lithuania and RiskMetrics.

NOTES

Note 1. Gold

	31 December 2010	31 December 2009
Gold holdings in:		
Troy ounces	186,994.08	186,984.41

Note 2. Receivables from the International Monetary Fund

LTL million

	31 December 2010	31 December 2009
Reserve tranche position with the International Monetary Fund	0.14	0.13
Balance in special drawing rights account with the International Monetary Fund	549.45	518.28
Total	549.58	518.41

The reserve tranche position with the International Monetary Fund (IMF) holdings belongs to the Republic of Lithuania, which is a member of the IMF since 1992. The Bank of Lithuania performs the function of depository of the IMF funds.

Quota of the Republic of Lithuania in the IMF totals SDR 144.20 million. Part of this Quota (25%) was paid in SDRs and the other part was paid in non-marketable and non-interest bearing Republic of Lithuania Government promissory notes denominated in national currency. The value of these Government securities issued for the benefit of the IMF as at 31 December 2010 amounted to SDR 143.66 million.

Reserve Tranche Position with the IMF

SDR million

	31 December 2010	31 December 2009
Quota of the Republic of Lithuania in the International Monetary Fund (total value)	144.20	144.20

Reserve tranche position with the International Monetary Fund	0.03	0.03

SDR 137.24 million (LTL 549.16 million) allocated by the IMF in 2009 are disclosed under balance sheet of the Bank of Lithuania assets item "Receivables from the International Monetary Fund" and under liability item "Counterpart of special drawing rights allocated by the International Monetary Fund". The amounts of interest payable and receivable on SDR funds recorded under the abovementioned items were the same.

Note 3. Deposits, Securities and Other Investments Denominated in Foreign Currency

LTL million

	31 December 2010	31 December 2009
Debt securities (other than those classified as held-to-maturity)	12,735.90	14,396.08
Debt securities classified as held-to-maturity	1,281.74	–
Reverse repurchase agreements	1,415.34	90.20
Claims on the ECB (TARGET2 ⁴ account)	621.24	80.34
Accounts with foreign banks	508.62	247.34
Total	16,562.84	14,813.96

In 2010 the portfolio of securities classified as held-to-maturity was formed. Securities from this portfolio are presented in the Annual Financial Statements at cost subject to impairment and any premiums or discounts are amortised. The market value of these securities at market rates prevailing on the balance sheet date was LTL 1,119.80 million.

The increase in the reverse repurchase agreements was caused by the tactical foreign reserve management investment decisions.

The majority of the Bank of Lithuania accounts with foreign banks are balances held with central banks of other states. Balances of the Bank of Lithuania in these accounts comprise LTL 500.60 million (LTL 201.71 million on 31 December 2009).

Liabilities of the Bank of Lithuania to participants of TARGET2 related to the claims of the Bank of Lithuania on the ECB arising due to operations performed via TARGET2 are presented in Note 13.

The breakdown of deposits, securities and other investments by currency is presented in Note 28.

Net book value as at 31 December 2009	126.04	13.26	2.24	8.75	0.50	150.79

The Bank of Lithuania has not concluded any transactions with the mortgage of tangible assets of the Bank of Lithuania.

Note 5. Investments into Equity Instruments

Since 1 May 2004 the Bank of Lithuania is a member of the ESCB. In accordance with Article 28 of the Statute of the ESCB and of the ECB, the Bank of Lithuania is the subscriber of the capital of the ECB. Shares of the national central banks in the subscribed capital of the ECB depend on the established key for the ECB capital subscription, which is adjusted every five years in accordance with Article 29.3 of the Statute of the ESCB and of the ECB or adjusted in the case of a change in the number of the European Union Members States in accordance with Article 48.3 of the Statute of the ESCB and of the ECB. The shares of the NCBs in the ECB's capital key are weighted according to the shares of the respective Member States in the EU's total population and GDP in equal measure, as notified to the ECB by the European Commission. The share of the Bank of Lithuania in the capital of the ECB as of 1 January 2009 comprises 0.4256 per cent.

The ECB increased its subscribed capital from EUR 5,760,652,402.58 to EUR 10,760,652,402.58 from 29 December 2010. In addition, according to the ECB decision the part of the subscribed capital which is required to be paid up was reduced from 7% to 3.75% for non-euro zone countries of the EU, subject to transitional provisions set in Article 47 of the Statute of the ESCB and of the ECB. Due to these changes, on 29 December 2010, the Bank of Lithuania made an additional payment of EUR 1.19 thousand to the capital of the ECB and the paid-up capital of the Bank of Lithuania as at 31 December 2010 amounted to EUR 1.72 million (LTL 5.93 million).

The Bank of Lithuania is a member of the Bank for International Settlements (BIS) with 1,070 shares, which acquisition cost is LTL 11.51 million and the nominal value of SDR 5,000 per share. The Bank of Lithuania has paid up 25 per cent of the value of these shares. In 2010 the Bank of Lithuania received dividends of LTL 3.01 million for these BIS shares (LTL 1.08 million in 2009).

The Bank of Lithuania owns 60 per cent of the shares of the Central Securities Depository of Lithuania AB (CSD). In 2010, by the decision of the annual general meeting of shareholders the authorised capital of the entity was reduced from LTL 6.05 million to LTL 2.50 million, proportionally reducing the number of the shares owned by the CSD shareholders. Following this decision, the acquisition cost of shares owned by the Bank of Lithuania decreased from LTL 3.63 million to LTL 1.50 million. In 2010 the Bank of Lithuania received dividends of LTL 1.38 million for the owned CSD shares (LTL 1.28 million in 2009).

The Bank of Lithuania holds one SWIFT share with the acquisition cost of LTL 3,249. Dividends are not paid for this share.

Note 6. Off-Balance-Sheet Instruments Revaluation Differences

Off-balance-sheet instruments revaluation differences represent the results of revaluation due to the changes of the official exchange rate of foreign exchange transactions and due to changes of the forward price of forward transactions in securities, which both are recorded in off-balance-sheet accounts (see Note 17).

Note 7. Accruals and Deferred Expenses

LTL million

Coins (including collector (commemorative) coins and numismatic sets of coins)	210.88	196.93
Total	8,823.95	7,932.19

Note 10. Liabilities to Domestic Credit Institutions Related to Monetary Policy Operations Denominated in Litas

This item consists of the holdings of required minimum reserves held by commercial banks in their current accounts with the Bank of Lithuania. From November 2008 credit institutions are subject to 4 per cent reserve requirement.

The Bank of Lithuania pays interest for the part of commercial bank required reserves that does not exceed the required reserve ratio used by the ECB for that period by applying marginal interest rates of the main refinancing operations of the Eurosystem set by the ECB (see Note 19). In 2010, the interest rate used for calculations of interest paid by the Bank of Lithuania for the part of required reserves of commercial banks was 1 per cent (in 2009 decreased from 2.45 to 1.00%).

Note 11. Liabilities to Other Domestic Institutions Denominated in Litas

LTL million
