The March increase in official reserve assets was driven by the growth of central government and other MFIs' deposits with the Bank of Lithuania, which made up respectively LTL 1.5 billion and LTL 381 million, as well as a hike in other factors by LTL 3.2 million. The growth in official reserve assets was contained by a decline in external liabilities of the Bank of Lithuania and currency in circulation respectively by LTL 466.3 million and LTL 77.4 million, as well as a negative change of LTL 5.6 million in the Special Drawing Rights allocation value.
