Where do insurance corporations invest and how much?

The Bank of Lithuania published financial accounts data for Q2 2021 (see [Financial accounts statistics](#)).

At the end of Q2 2021, the financial assets of insurance corporations¹ amounted to €2,685.3 million, thus increasing 7 times since 2003.

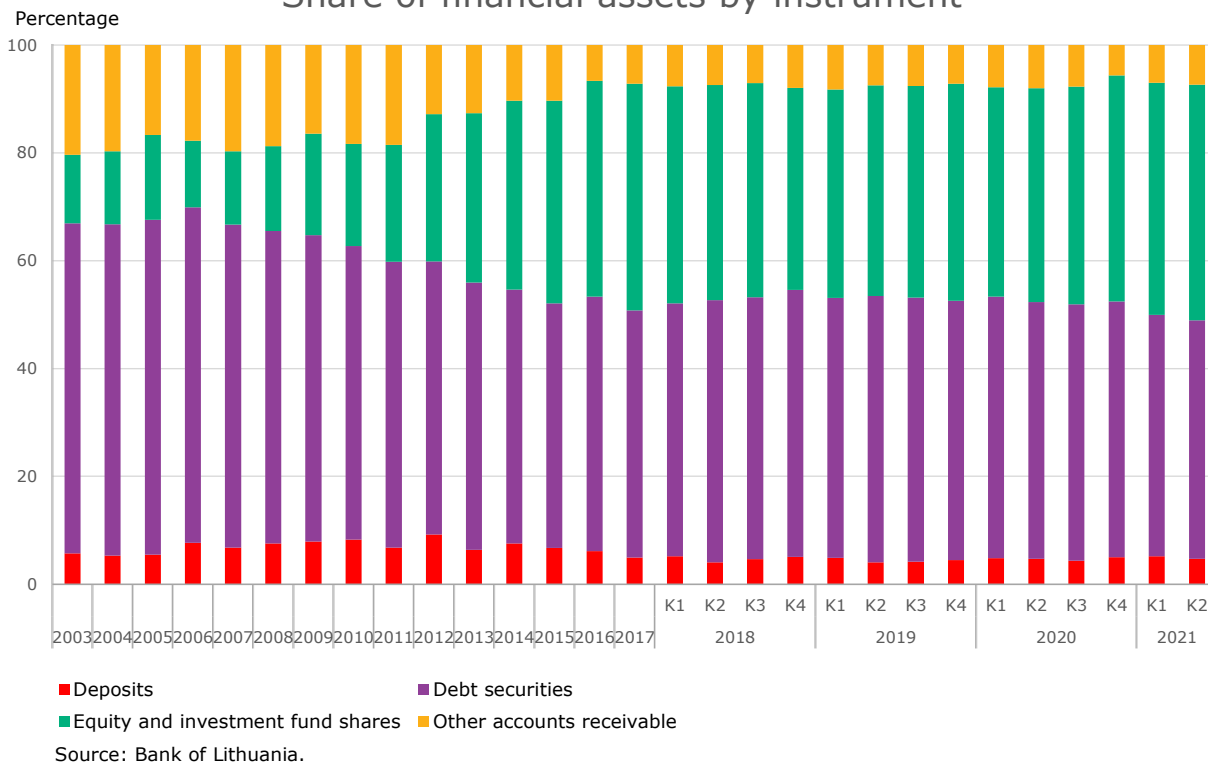

Insurance corporations invest mainly in equity instruments and investment fund shares as well as debt securities. At the end of Q2 2021, these investments amounted to €1,187.5 million and €1,175.2 million respectively. These investments have grown 24 times and 5 times respectively since the end of 2003.

The structure of the financial assets of insurance corporations has shifted over the years. The share of debt securities in the financial assets contracted from 61% at the end of 2003 to 44% at the end of Q2 2021. By contrast, the share of investments in equity instruments and investment fund shares has increased: they accounted for as little as 13% of the total financial assets in 2003 and 41% at the end of Q2 2021.
