General Information of the Republic of Lithuania

Area	65.3 thousand km ²
Population (1 January 2006), thousand	
Total	3,403.3
Urban	2,268.8
Rural	1,134.5
Density, population per 1 km ²	52.1
Population by sex, thousand	
Males	1,586.7
Females	1,816.6
Capital	Vilnius
Population of Vilnius (1 January 2006), thousand	541.8
Currency unit	Litas
Gross domestic product (in 2005)	
Total, EUR million	20,587
Per capita, EUR	6,030

Symbols and Conventions

–	Category not applicable
0.0	Magnitude less than indicated measurement units
...	Data not available, although the phenomenon existed

Abbreviations

Ct	Lithuanian cents
ECB	European Central Bank
EU	European Union

1 LTL	The 75 th anniversary of the Bank of Lithuania and the litas (golden)	29 September 1997
50 LTL	The 200 th birth anniversary of Adam Mickiewicz (Adomas Mickevičius)	30 March 1998
10 LTL	Dedicated to Vilnius (from the series "Lithuanian Cities")	30 September 1998
50 LTL	Algirdas, the Grand Duke of Lithuania (from the series "The Rulers of Lithuania")	7 December 1998
5 LTL	The United Nations Children's Fund (UNICEF) coin program "Children of the World"	21 December 1998
10 LTL	Dedicated to Kaunas (from the series "Lithuanian Cities")	6 April 1999
50 LTL	Commemorate Vincas Kudirka (1858–1899)	31 May 1999
50 LTL	The 10 th anniversary of the Baltic Way	16 August 1999
50 LTL	Kęstutis, the Grand Duke of Lithuania (from the series "The Rulers of Lithuania")	29 November 1999
10 LTL	International Program "The Smallest Gold Coin of the World. History of Gold"	21 December 1999
50 LTL	The 350 th anniversary of the publication "The Great Art of Artillery" by Kazimieras Semenavičius	1 February 2000
50 LTL	The 10 th anniversary of the reestablishment of independence	6 March 2000
50 LTL	The XXVII Olympic Games in Sydney	10 July 2000
50 LTL	Vytautas, the Grand Duke of Lithuania (from the series "The Rulers of Lithuania")	30 November 2000
100 LTL	Vytautas, the Grand Duke of Lithuania (from the series "The Rulers of Lithuania"; golden)	30 November 2000
50 LTL	The New Millennium	27 December 2000
50 LTL	The 200 th birth anniversary of Motiejus Valančius	28 February 2001
50 LTL	The 150 th birth anniversary of Jonas Basanavičius (1851–1927)	19 November 2001
10 LTL	Dedicated to Klaipėda (from the series "Lithuanian Cities")	27 March 2002
5 LTL	Featuring Lithuanian nature (International Coin Program "Endangered Wildlife")	26 June 2002
50 LTL	Dedicated to Trakai Island Castle (from the series "Historical and Architectural Monuments of Lithuania")	30 September 2002
200 LTL	The 750 th anniversary of the crowning of Mindaugas (gold–silver)	25 June 2003
50 LTL	Dedicated to Vilnius Cathedral (from the series "Historical and Architectural Monuments of Lithuania")	30 July 2003
50 LTL	The XXVIII Olympic Games in Athens	17 October 2003
50 LTL	The 425 th anniversary of Vilnius University	20 April 2004
50 LTL	Dedicated to Pažaislis Camaldolese monastery (from the series "Historical and Architectural Monuments of Lithuania")	22 June 2004
50 LTL	The 425 th anniversary of the First Statute of Lithuania	14 September 2004
50 LTL	Dedicated to Curonian Spit (UNESCO World Heritage)	15 December 2004
50 LTL	Dedicated to Kernavė (from the series "Historical and Architectural Monuments of Lithuania")	15 March 2005
50 LTL	The 150 th anniversary of the National Museum of Lithuania	11 May 2005
50 LTL	Dedicated to Cardinal Vincentas Sladkevičius (1920–2000)	5 July 2005
500 LTL	Dedicated to the Palace of the Rulers of the Grand Duchy of Lithuania	20 September 2005
50 LTL	The 100 th anniversary of the Great Seimas of Vilnius	1 December 2005

7. General Notes

1. Monetary Financial Institutions Balance Sheet and Monetary Statistics

The chapter provides data on the MFIs of Lithuania. The data on the balance sheet of MFIs of Lithuania is collected from commercial banks of Lithuania and foreign banks branches in accordance with the Bank of Lithuania Resolution No. 46 of 8 May 2003 on the Balance Sheet Statistical Reporting of the Monetary Financial Institutions and the data of the Bank of Lithuania accounting documents. This data is grossed up to cover 100 per cent of the total balance of all the credit institutions including Central credit union of Lithuania and other credit unions. Currently, the grossing up procedure to cover also MMF is not performed.

The data complies with the ECB requirements laid out in the Regulation (EC) No 2423/2001 concerning the consolidated balance sheet of the monetary financial institutions sector (ECB/2001/13), as corrected and amended. The data is classified into categories on the basis of the requirements of this Regulation that are consistent with the classification principles laid down in ESA95.

Main categories of the assets and liabilities in the balance sheet are the following:

- cash – domestic and foreign banknotes and coins in circulation that are commonly used to make payments held by MFIs;
- loans – funds lent to borrowers – not evidenced by negotiable documents or are represented by a single document in case it has become as such – and amounts of financial leases, etc. This category also includes assets of MFIs in the form of deposits;
- securities other than shares – bonds, notes, certificates and similar negotiable documents that are usually traded on secondary markets; they do not grant to the holder any ownership rights over the institution issuing them. The category also includes subordinated debt in the form of securities;
- MMF shares (units) – close substitute for deposits in terms of liquidity. These are shares (units) of such collective investment undertakings which (1) invest primarily into money market instruments and/or in MMF shares (units) and/or in other transferable debt instruments with a residual maturity of up to and including one year, and/or in bank deposits, and/or (2) rate of return on their shares (units) is similar to interest rate on money market instruments;
- shares and other equity – holdings of securities which represent property rights on a stake in a corporation, i.e., shares traded on stock exchanges (quoted shares), unquoted shares and other forms of equity; they usually generate income for the holders in the form of dividends;
- currency in circulation – banknotes and coins in circulation issued by the Bank of Lithuania, that are commonly used to make payments. This category does not comprise collectors coins issued at a price above their face value;
- deposits – amounts owed to creditors without issuing negotiable securities. This category also includes MFIs liabilities in the form of loans;
 - overnight deposits – deposits in both national and foreign currencies, which are convertible into currency or may be transferred against a cheque, banker's order, etc. on demand, without any delay, restriction or fine. This subcategory also includes non-transferable deposits that are convertible on demand or by close of business the following working day without any significant penalty or restriction;
 - deposits with agreed maturity – non-transferable deposits which may not be converted into currency prior to the agreed fixed term or which may be converted into currency prior to that agreed term, although in that case a fine of a particular type shall be levied on the depositor;
 - deposits redeemable at notice – non-transferable deposits without agreed maturity that may not be converted into currency without a period of prior notice, until the expiration of which these deposits may not be converted into currency, or may be converted upon payment of a fine;
 - repurchase agreement – an arrangement to sell an asset and to repurchase it at a specified price on a predetermined future date or on demand. Such agreements are similar to collateralised loans secured by a pledge of securities, although it differs in that the seller does not retain legal ownership of the assets. These three-type repurchase operations (repurchase agreements, bond lending against cash collateral and sale/buy-back agreement) are structured so that the necessary conditions are fulfilled and that these operations may be treated as collateralised loans, and classified under this subcategory.
- debt securities issued – bonds, notes, certificates and similar negotiable securities that are usually traded on the secondary markets; they do not grant the holder any ownership rights over the issuer. This category also comprises the issued subordinated debt in the form of securities;
- capital and reserves – financial assets as defined in category "shares and other equity" and the funds whose resource are undistributed profit or funds set aside by MFIs in anticipation of likely future payments or obligations: owners' contributions, including share premium, profit/loss of current year, reserves and revaluation accounts, profit/loss of the previous year, provisions for loans, securities and other assets. This definition is used only for statistical purposes.

Sectoral classification is based on principles of the ESA95 classification of institutional units by institutional sectors and sub-sectors. Their detailed description is provided in the ECB publication „Money and banking statistics sector manual: guidance for the statistical classification of customers“. The concept "residents" in this chapter means residents of Lithuania.

The table shows sectors or groups thereof, as well as their compliance with the ESA95 institutional sectors and sub-sectors.

					ESA95 sectors	
Resident sector	The money-issuing sector	MFIs	Bank of Lithuania		S.121	
			Other MFIs		S.122	
				O/w: MMFs		
	The money-neutral sector	Non-MFIs	Central government			S.1311
			Other government	Local government		S.1313
	The money-holding sector	Non-MFIs		Social security funds		S.1314
			Other resident sectors	Financial intermediaries	Other financial intermediaries and financial auxiliaries	S.123 + S.124
					Insurance corporations and pension funds	S.125
			Non-financial corporations and households including non-profit institutions serving households	Non-financial corporations and households including non-profit institutions serving households	Non-financial corporations	S.11
					Households including non-profit institutions serving households	S.14 + S.15
Non-resident sector		MFIs (banks)			S.2	
		Non-MFIs (non-banks)	Government			
			Other sectors			

Resident sector:

- MFIs – financial institutions which together form the money-issuing sector of Lithuania. In Lithuania apart from the Bank of Lithuania these include commercial banks, foreign bank branches, Central credit union of Lithuania, other credit unions and money market funds (collective investment undertakings, i.e., investment funds or investment variable capital companies in case they invest exclusively or most often into such short-term money market instruments as certificates of deposit, commercial papers and bank acceptances, and treasury or local authority bills). List of Lithuanian MFIs for statistical purposes is updated every month and published on the website of the Bank of Lithuania. MFIs of Lithuania are also included in the list of MFIs of the EU countries which has been compiled for the statistical purposes and updated every month by the ECB. This list is published on the ECB website;
- central government – is the government, as defined by ESA 95, other than local government and social security funds. It includes all the administrative departments of the State and other central agencies whose competence extends normally over the whole economic territory, except for the administration of social security funds. Administration of counties is an area of activity of the central government;
- local government, as defined in ESA95, includes those types of public administration whose competence extends to only a local part of the economic territory, apart from local agencies of social security funds;
- social security funds – are all central and local institutional units whose principal activity is to provide social benefits and which fulfil each of the following two criteria: a) by law or by regulation certain groups of the population are obliged to participate in the scheme or to pay contributions; b) general government is responsible for the management of the institution in respect of the settlement or approval of the contributions and benefits independently from its role as supervisory body or employer. In Lithuania these are State Social Insurance Fund Board under the Ministry of Social Security and Labour and branches thereof, State Patient Fund under the Ministry of Health and territorial patient funds;
- other financial intermediaries and financial auxiliaries – are private and public entities which are principally engaged in financial intermediation (except for MFIs, insurance corporations and pension funds), i.e., engaged in borrowing, transforming and onlending funds on their own account. Entities which are principally engaged in facilitating financial intermediation, but which are not financial intermediaries themselves in the MFIs balance sheet and monetary statistics, are also included under this subcategory;
- insurance corporations and pension funds – are financial corporations and quasi-corporations which are principally engaged in financial intermediation as the consequence of the pooling of risk. This category comprises both life and non-life insurance activities. It does not include pension schemes which are not autonomous pension funds (have no autonomy of decision and do not keep a complete set of accounts) and are classified as social security funds;
- non-financial corporations – are private and public entities whose principal activity is not financial intermediation activities, but the production of goods and provision of non-financial services with the objective to generate profit;
- households and non-profit institutions serving households – covers individuals or groups of individuals belonging to the household sector of Lithuania acting as: (1) consumers, (2) producers of goods and non-financial services exclusively for their own final consumption and 3) small market producers (such as sole proprietorships, farmers, businessmen working with business certificate, etc. that usually use own labour and financial resources). The sector of non-profit institutions serving households consists of separate legal institutional units, which serve particular groups of households, whose principal resources are derived, for instance, from occasional sales, voluntary contributions, from occasional payments made by general government and from property income (trade unions, political parties, churches and religious societies, charities, etc.).

Non-resident sector:

- MFIs (banks) – MFIs residing in the EU, including ECB, and institutions residing outside the EU, similar to MFIs. EU MFIs group consists of ECB, national central banks and credit institutions as defined in Directive 2000/12/EC of the European Parliament and of the Council of 20 March 2000 relating to the taking up and pursuit of the business of credit institutions (and subsequent amendments thereto) and all the other resident financial institutions whose business is to receive deposits and/or close substitutes for deposits from institutional units other than MFIs, and, for their own account (at least in economic terms), to grant loans and/or to make investment in securities. The latter mostly made up of money market funds. Definition of a group Banks basically corresponds to that of a group MFIs, which comprise the sub-sector the central bank and the sub-sector other MFI as defined by ESA95;
- general government – means central and local government and social security funds as defined in the resident sector and state government as defined in ESA95. This category also includes all (even those located in Lithuania) international and supranational organisations excluding the ECB;
- other sectors – other financial intermediaries and financial auxiliaries, insurance corporations and pension funds, non-financial corporations, households and non-profit institutions serving households, as defined in resident sector.

Euro area encompasses those Member States in which the euro has been adopted as the single currency. The euro area currently comprises Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal and Spain. For purposes of monetary statistics the euro area also includes the ECB.

Without prejudice to prevailing accounting and netting practices, for monetary statistics purposes all financial assets and all financial liabilities reported on a gross basis. Reported nominal value of loans and deposits excludes accrued interest. Accrued interest on securities held or issued is not included into the value of related securities.

Asset and liability items denominated in foreign currencies are converted into litas on the basis of official currency exchange rates announced by the Bank of Lithuania at the end of the reporting period.

Seasonal adjustments are not used.

Table 1.5

The data on aggregated balance sheet of resident other MFIs, i. e., institutions attributed to MFI sector (excluding the Bank of Lithuania), that also include inter-MFI asset and liability positions are presented in this subsection.

Tables 1.1–1.5

Loans to residents also comprise deposits in other MFIs or financial institutions.

Table 1.9

Consolidated balance sheet of all resident MFIs data in which inter-MFI asset and liability positions are eliminated – amounts of the corresponding MFIs balance sheet items in the asset side have been subtracted from the MFIs balance sheet liabilities – are presented in this subsection. The sum of the inter-MFI positions is not necessarily zero, therefore the difference is given in the last row of Table (Excess of inter-MFI liabilities).

Table 1.12

Monetary aggregates and counterparts of Lithuania according to the ECB definition are calculated from the consolidated MFIs balance sheet. They also include some of monetary liabilities of the central government although debt securities of the maturity of up to 2 years held by the MFIs of Lithuania shall be excluded.

Table 1.22

Loans to non-residents also include deposits in other MFIs (banks) or financial institutions.

Tables 1.22–1.30

EU non-euro area means the economic territory of the EU, excluding euro area and Lithuania. As from 1 May 2004, it also encompasses Cyprus, Czech Republic, Estonia, Hungary, Latvia, Malta, Poland, Slovakia and Slovenia.

2. Money, Currency and Financial Markets Statistics

Tables 2.1–2.3

Data on amounts of and interest rates applied to loans and time deposit transactions concluded between resident banks.

Tables 2.4–2.6

Data on the turnover of currency purchase and sale transactions in litas (both cash and non-cash) concluded by banks.

Aggregated data are calculated on the basis of weekly statements submitted by banks about the transactions concluded during the reporting period.

Non-cash purchase and sale transactions are presented:

by types:

- spot transactions – currency purchase and sale, when the related currency transfers and payments take place in two business days after the deal is concluded;
- forward exchange contracts in which the counterparties agree to exchange (buy or sell) currencies at agreed contract price on a specific date;
- swaps simultaneous buying and selling of a currency. Contain data on the second operation of the transactions;
- option contracts that grant the right, but no obligation, to purchase or sell a currency at an agreed exchange rate during a specified period.

by counterparty of transactions:

- contracts concluded by the banks with resident and non-resident credit institutions (banks), with resident and non-resident non-credit institutions.

Transactions with the Bank of Lithuania are not included.

Tables 2.7 – 2.8

The Republic of Lithuania Government Securities are debt securities (treasury bills and bonds) issued by the Government in the name of the Republic of Lithuania. Debt securities confirm the issuer's (debtor's) and investor's (lender's, holder's) rights and duties specified in the issue terms and conditions, such as the issuer's obligation to make one or more payments to the holder (lender) at specified future dates, etc. Usually, an exact (fixed) interest rate (coupon) of securities issued by the Government of the Republic of Lithuania is stated. However, Government Securities may have a variable interest rate, as well. Generally, short-term debt securities (up to one year) are sold at a discounted value (or price, lower than the nominal value), which, at the maturity, is paid-back together with the accrued interest (e.g. nominal value). Debt securities issued with the original maturity of more than one year are classified as long-term securities. Long-term securities may be sold at a discount, nominal value or with a premium (price, higher than their nominal value).

In the domestic market Government Securities are usually sold at auctions. An auction is held by the Bank of Lithuania on the basis of the agreement concluded between the Bank of Lithuania and the Ministry of Finance of the Republic of Lithuania. The auction is conducted by the Auction Commission formed in accordance with the mentioned agreement. The Ministry of Finance of the Republic of Lithuania specifies terms and conditions of the Government Securities to be sold at the auction (securities type, total amount of the issue, maturity, terms, nominal value, etc.), the auction type and issue share attributed to non-competitive bids. The Ministry of Finance of the Republic of Lithuania may propose a certain portion of the outstanding Government Securities issue for investors to buy-back at auctions before maturity. In such a case, Government Securities repurchase terms and conditions, the auction type and the upper limit for securities to be allotted to non-competitive bids, etc., shall also be specified by the Ministry of Finance of the Republic of Lithuania. The financial and credit institutions, that comply with the requirements and criteria defined in the Republic of Lithuania Government Securities Auction Regulations approved by the Board of the Bank of Lithuania, and that have made the Agreement of an Auction Participant with the Bank of Lithuania, have exclusive access to Government Securities auctions, held by the Bank of Lithuania.

3. Balance of Payments and Foreign Reserve Statistics

The balance of payments is a statistical report that includes the value of operations of economic nature between a specific state and other states (non-residents) that occurred during a certain period. The main objective of the balance of payments is to show the level of balance in the state's foreign economic relations. Transactions related to the change of ownership, including the emergence or liquidation of claims and liabilities, are included in the accounts. Changes of claims and liabilities that do not result from transactions are not included in the items of the balance of payments:

- export and import of goods and services and labour and investment income;
- transfers;
- changes of the financial claims and liabilities of the state and changes of official reserve assets.

The Bank of Lithuania is responsible for the compilation and publication of the balance of payments in accordance with Law on the Bank of Lithuania, Article 8, Paragraph 9.

The balance of payments is compiled in accordance with the fundamental methodological requirements and the standards of presentation and publication of the IMF (5th edition of the IMF's Balance of Payments Manual), and the Eurostat Vade mecum, April 2005; Regulation (EC) No 184/2005 of the European Parliament and of the Council of 12 January 2005 on Community statistics concerning balance of payments, international trade in services and foreign direct investment; Guideline of the European Central Bank of 16 July 2004 on the statistical reporting requirements of the European Central Bank in the field of balance of payments and international investment position statistics, and the international reserves template (ECB/2004/15); Resolution of the Board of the Bank of Lithuania

on Approval of the Procedure for submitting to the Bank of Lithuania the Reporting Statistical Data Necessary for the Preparation of the Republic of Lithuania Balance of Payments and International investment position.

All transactions are valued at market price, i.e., the price for which the seller is ready to sell a product or a service and the buyer is ready to pay that price.

The balance of payments is compiled on the basis of the double entry principle the main principle of accounting. It means that each economic operation is shown in the balance twice: in the debit of one item and the credit of another item. The economic interpretation of this rule is simple: most economic operations are nothing more than an exchange of economic valuables. If economic valuables (goods, services or financial assets) are transferred or received without payment, then such operations are reflected in a special item "transfers".

Since a positive sign marks credit and debit is marked by a negative sign, the sum of all entries should equal zero. However, in practice it is difficult to reach this balance, since the data that characterise the reverse sides of the same economic operations are received from different information sources that do not always match. For example, data on the export of goods are received on the basis of customs declarations and information on the currency inflows into the accounts of exporting economic entities is received from bank statistics or statistical reporting of companies. Therefore, the balance of payments provides for a balancing item "errors and omissions".

From the first quarter of 1995 the Bank of Lithuania prepares the national balance of payments, coordinates all work related to the collection of information necessary for the compilation of the balance of payments and systematically guides this work. The balance of payments consists of standard items. The current account shows bilateral transactions in trade and services, receivable and payable interest, dividends and current transfers (transfer of securities and cash, humanitarian aid, etc.). The capital account registers capital transfers and the purchase and sale of non-produced, non-financial assets and intangible assets (intangible valuables) by non-residents. The financial account registers the movement of financial assets from one country to another.

MERCHANDISE TRADE

Until 1 May 2004 foreign trade statistics was prepared on the basis of the data of the Single Administrative Document of customs declarations. Having acceded to the EU customs borders were revoked. Now, while trading with the EU Member States, exporters and importers do not need to fill in the Single Administrative Document any longer. Accordingly, no main source of foreign trade statistics data remains. In order to collect data on foreign trade between Lithuania and the EU countries the data collection system Intrastat has been established.

Thus, foreign trade data of the Republic of Lithuania have been divided in two parts: Extrastat and Intrastat. The Extrastat system includes data on trade between Lithuania and non-member countries of the EU, the source of these data being information of the Single Administrative Document of customs declarations.

Intrastat is a data collection system based on information from the enterprises trading with the EU countries.

Four indicators estimate foreign trade of Lithuania: exports and imports will estimate trade volumes of Lithuania with non-member countries of the EU, while dispatches and arrivals will estimate trade with the EU countries.

The data on goods delivered at the ports of transport agencies are received from the reports of transport companies. Merchandise exports and imports are valued on an f.o.b. price basis. In this respect, the Bank of Lithuania make some adjustments for freight (about 6% of total imports).

SERVICES

Data on the services rendered by resident non-financial enterprises to non-residents and the services rendered by non-residents to the economic entities of Lithuania are received on the basis of statistical research performed by the Department of Statistics of Lithuania. All categories of services are separated in questionnaires and it enables the aggregation of available data according to the standard groups of services of the 5th edition of the BMP of the IMF and the extended classification of services by the Eurostat and the OECD. More than five thousand companies complete the said questionnaire.

Transportation it covers all transportation services that are provided by residents of one economy for those of another and that involve the carriage of passengers, the movement of goods (freight), rentals (charters) of carriers with crew, other transportation services and related supporting and auxiliary services.

Travel covers primarily the goods and services acquired from an economy by travelers during visits of less than one year to that economy. The goods and services are purchased by, or on behalf of, the travelers or provided, without a quid pro quo (that is, are provided as a gift), for the travelers to use or give away. Excluded are transportation of travelers within the economies that they are visiting, where such transportation is provided by carriers not resident in the particular economy being visited, as well as the international carriage of travelers, both of which are covered in passenger services under transportation. Also excluded are goods purchased by a travelers for resale in the traveler's own economy or in any other economy. Travel is divided in two subcomponents: Business travel and Personal travel.

Communication services comprise postal and courier services and telecommunication services.

Construction services comprises:

- construction abroad;
- construction in the compiling economy.

Insurance services covers the provision of various types of insurance to non-residents by resident insurance enterprises, and vice versa. These services are estimated or valued by the service charges included in total premiums rather than by the total value of the premiums. It comprises life insurance and pension funding, freight insurance, other direct insurance, reinsurance and auxiliary services. Holders of life insurance policies, both with profit and without profit, make regular payments to an insurer (there may be only a single payment), in return for which the insurer guarantees to pay the policy holder an agreed minimum sum or an annuity, at a given date or at the death of the policy holder, if this occurs earlier. Term life insurance, where benefits are provided in the case of death but in no other circumstances, is a form of direct insurance, and is excluded here and included in other direct insurance.

Financial services covers financial intermediation and auxiliary services except those of life insurance enterprises and pension funds (which are included in life insurance and pension funding) and other insurance services that are conducted between residents and non-residents. Banks, stock exchanges, factoring enterprises, credit card enterprises and other enterprises may provide such services. Included are services provided in connection with transactions in financial instruments, as well as other services related to financial activity, such as advisory, custody and asset management services.

Computer and information services comprises computer services and information services.

Royalties and licence fees comprises franchises and similar rights and other royalties and licence fees.

Other business services comprises merchandise and other trade-related services, operational leasing services and miscellaneous business, professional, and technical services.

Personal, cultural and recreational services comprises audiovisual and related services and other personal, cultural and recreational services.

Government services, n.i.e. is a residual category covering government transactions (including those of international organizations) not contained in the other components of the Extended Balance of Payments Services classification (EBOPS). Included are all transactions (in both goods and services) by embassies, consulates, military units and defense agencies with residents of economies in which the embassies, consulates, military units and defense agencies are located and all transactions with other economies.

INCOME

Income covers two types of transactions between residents and non-residents:

- those involving compensation of employees, which is paid to non-resident workers (e.g. border, seasonal and other short-term workers);
- those involving investment income receipts and payments on external financial assets and liabilities.

Compensation of employees comprises wages, salaries, and other benefits, in cash or in kind, earned by individuals, in economies other than those in which they are resident, for work performed for (and paid for by) residents of those economies. Included are contributions paid by employers, on behalf of employees, to social security schemes or to private insurance or pension funds (whether funded or unfunded) to secure benefits for employees.

Investment income is income derived from ownership of external financial assets and payable by residents of one economy to residents of another economy. Investment income includes interest, dividends, remittances of branch profits, and direct investors' shares of the retained earnings of direct investment enterprises. Investment income should be classified by direct, portfolio and other investment components.

CURRENT TRANSFERS

Current transfers are offset items to unilateral transactions in which one economic entity provides a real resource or a financial item to another entity without receiving any real resource or financial item in exchange. These resources are consumed immediately or shortly after the transfer is made. Current transfers are all transfers that are not capital. Current transfers are classified according to the sector of the compiling economy into general government and other sectors.

CAPITAL ACCOUNT

The capital account covers all transactions that involve the receipt or payment of capital transfers and acquisition/disposal of non-produced, non-financial assets. This item includes only the value of foreign investment projects.

FINANCIAL ACCOUNT

Financial account covers direct investment, portfolio investment, financial derivatives, and other investment and reserve assets. The financial account covers all transactions associated with changes of ownership in the foreign financial assets and liabilities of an economy. Such changes include the creation and liquidation of claims on, or by the rest of the world. All components are classified according to the type of investment or by functional subdivision (direct investment, portfolio investment, financial derivatives, other investment, reserve assets).

FOREIGN DIRECT INVESTMENT

It is the category of international investment that reflects the objective of a resident entity in one economy (direct investor) obtaining a lasting interest in an enterprise resident in an economy other than that of the investor (direct investment enterprise). "Lasting interest" implies the existence of a long-term relationship between the direct

investor and the enterprise and a significant degree of influence by the investor on the management of the direct investment enterprise. Direct investment comprises the initial transaction between the two entities, that is, the transaction that establishes the direct investment relationship, and all subsequent transactions between them and among affiliated enterprises, both incorporated and unincorporated.

Direct investment is classified primarily on a directional basis, resident direct investment abroad and non-resident investment in Lithuania. Direct investment comprises equity capital, reinvested earnings, and other capital.

PORTFOLIO INVESTMENT

Portfolio investment covers transactions in equity and debt securities. Debt securities are subdivided into bonds and notes and money market instruments. In the case of securities with coupons, the interest accrued from the last payment of interest is included and, in that of securities issued at a discount, the interest accumulated since the issue is included. Inclusion of interest accrued is required for the financial account of the balance of payments and the international investment position.

FINANCIAL DERIVATIVES

Financial derivatives are financial instruments that are linked to a specific financial instrument, indicator or commodity, and through which specific financial risks can be traded in financial markets in their own right. Transactions in financial derivatives are treated as separate transactions rather than as integral parts of the value of underlying transactions to which they may be linked.

Transactions and positions in options, futures, swaps, forward foreign exchange contracts, credit derivatives and embedded derivatives are recorded in the balance of payments, international reserves and international investment position. For practical reasons, embedded derivatives are not distinguished from the underlying instrument to which they are linked. Net flows associated with interest rate derivatives are recorded as financial derivatives, not as investment income, in line with a recent international agreement. The classification of specific instruments of credit derivatives should be decided on a case-by-case basis. Initial margin payments are regarded as changes in deposits and should be recorded, if identifiable, under "other investment".

OTHER INVESTMENT

Other investment is defined as a residual category that includes all financial transactions not covered in the direct investment, portfolio investment, financial derivatives or reserve assets categories. Other investment covers trade credits, loans, currency and deposits and other assets (other liabilities). It also encompasses the offsetting entries for accrued income on instruments classified under other investment.

OFFICIAL RESERVE ASSETS

Official reserve assets are highly liquid, marketable and creditworthy foreign assets controlled by the central bank that may be used for financing the balance of payments deficit and other similar purposes. Official reserve assets are composed of monetary gold, holdings of special drawing rights, and reserve position in the International Monetary Fund, central bank assets in foreign currency (in convertible currency in banknotes and coins as well as funds in the accounts of foreign banks), liquid securities of foreign governments (including repurchase agreements) and other liquid assets. The official reserve assets data are compiled in accordance with the methodology set out both the 5th edition of the BMP of IMF and Operational Guidelines for the Data Template on International Reserves and Foreign Currency Liquidity.

4. Payment Instruments Statistics

Tables 4.1–4.4

The Bank of Lithuania started publishing the statistics on cashless payments from 2001. In the Tables 4.1–4.4 provides data on commercial banks and foreign bank branches.

Cashless payment transactions comprise domestic and cross-border payments initiated by a payer or a beneficiary for the processing of which the following payment instruments are used: credit transfers, direct debits, payments by cards with a debit/credit function, virtual cards, electronic money or cheques.

The data include the payments where the payer or the beneficiary is a natural person or a legal person that is not a MFIs.

Credit transfers are payments initiated by a payer where a payment instruction submitted to the payer's credit institutions is processed to transfers the payer's funds to the beneficiary's account at a credit institutions. Credit transfers also comprise payments initiated by a payer, performed through ATMs using payment cards issued by credit institutions, and postal orders. Credit transfers via electronic data transmission network are payment orders initiated and submitted to the credit institution by the special personal computer software installed in the payer's computer. Credit transfers via Internet are payment orders initiated and submitted to the credit institution using the software from the credit institution's Internet site.

Direct debits are one-off and/or recurrent direct debits initiated by a beneficiary where a payment instruction submitted to the payer's or the beneficiary's credit institution is processed to transfer the payer's funds to the beneficiary's account at the credit institution. The beneficiary has a right to submit a payment instruction if it has a written consent by the payer to debit funds from its account and the aforementioned consent is submitted to the payer's credit institution.

Payment by cards with a debit/credit function include payment transactions performed by cards with a debit/credit function issued in the country at a terminal, via Internet or by telephone.

Electronic money payments include transactions where the holder of e-money issued in the country transfers e-money value from the memory of a card, computer or other equipment to the balance of the merchant or other beneficiary. Electronic money means a value in terms of money as an expression of a holder's claim to a credit institution, stored in the electronic payment instrument issued by a credit institution (in the memory of a stored-value card, computer or other equipment). After using an authentication instrument, electronic money may be used for effecting payments to any beneficiary in a position to accept such payments and/or by their holder for withdrawal of cash.

Cards with a debit function are the cards issued in the country by a credit institution that allow direct debiting of funds from the account of the cardholder. Cards with a debit function may be linked to an account that offers overdraft facilities.

Cards with a credit function are the cards issued in the country by a credit institution indicating that the cardholder has been granted a credit line. They allow the holder to make purchases and/or withdraw cash up to a prearranged ceiling. The credit granted can be settled in full by the end of a specified period or can be settled in part with the balance taken as extended credit. Interest is usually charged on the amount of any extended credit.

Domestic cards are the cards valid only in the Republic of Lithuania, while international cards are the cards designated for use in the Republic of Lithuania and abroad.

ATMs are electromechanical devices allowing the authorised user to withdraw cash, transfer funds and take advantage of a range of other services by using a payment card.

POS terminals are devices at commercial or services companies and client service offices of credit institutions that allow making payments and/or withdrawing cash by means of cards with a debit/credit function.

E-money card accepting terminals are electromechanical devices at commercial or services companies and client service offices of credit institutions allowing a holder of a card with an e-money function to make payments or withdraw cash.

8. MAIN DATES IN THE HISTORY OF NATIONAL BANKING

1922

- 9 August Law on the Currency Unit passed by the Constituent Seimas
- 11 August Law on the Bank of Lithuania passed by the Constituent Seimas
- 22 September Statute of the Bank of Lithuania approved by the Cabinet Ministers
- 27 September The Bank of Lithuania established during the constituent meeting of shareholders
- 2 October Beginning of the activities of the Bank of Lithuania
- Introduction of the litas
- Exchange of the ostmark into the litas started

1923

- 1 January Settlements in the ostmark terminated
- 6 February All institutions of public authority prohibited from collecting taxes and duties in foreign currencies
- 23 February First independent branch of the Bank of Lithuania opened in Klaipėda
- 1 March The first treasury-house incorporated into the Bank of Lithuania
- 28 March Branch of the Bank of Lithuania opened in Kybartai
- 27 June The last treasury-house incorporated into the Bank of Lithuania (21 treasury-houses incorporated into the Bank of Lithuania)

1925

- Branches of the Bank of Lithuania opened in Biržai and Šilutė
- Silver and bronze coins put into circulation

1928

- 15 July First quarterly Bulletin of the Bank of Lithuania issued

1930

- Branches of the Bank of Lithuania opened in Jurbarkas and Joniškis

1931

- The Bank of Lithuania became a member of the Bank for International Settlements

1932

- The Bank of Lithuania had 26 branches

1938

- 17 March Panemunės currency exchange office of the Bank of Lithuania opened

1939

- 2 November Branches of the Bank of Lithuania opened in Vilnius, Trakai and Švenčionys (at the end of 1939, 29 branches of the Bank of Lithuania were in operation)

1940

- 26 July Law on the Nationalisation of Banks passed
- 6 August All banks nationalised
- The nationalised Bank of Lithuania transferred to jurisdiction of the USSR Gosbank as its national branch

1990

- 13 February Law on the Bank of Lithuania passed by the Supreme Council of the Lithuanian SSR
- 1 March The Bank of Lithuania established
- 13 March Chairman of the Board of the Bank of Lithuania approved by the Supreme Council – Reconstituent Seimas of the Republic of Lithuania
- 4 September Statute and fixed capital of the Bank of Lithuania approved by the Supreme Council – Reconstituent Seimas of the Republic of Lithuania
- 2 October Law on the Property of the USSR Banks Operating in the Republic of Lithuania and Resolution on its enforcement passed by the Supreme Council – Reconstituent Seimas of the Republic of Lithuania
- 3 November Resolution on the Production of Coins of Republic of Lithuania adopted by the Government of the Republic of Lithuania

17 November	Resolution on the Production of the Litas Banknotes adopted by the Government of the Republic of Lithuania
27 December	First foreign exchange account opened at the Bank of Lithuania
1991	
28 February	First correspondent account of the Bank of Lithuania opened in Sweden
1 March	Republican Currency Collection Office of the USSR Gosbank incorporated into the Bank of Lithuania
21 March	Provisional Law on Foreign Currency Funds and Settlements in Convertible Currency passed by the Supreme Council – Reconstituent Seimas of the Republic of Lithuania
31 October	First shipment of coins minted delivered to the Bank of Lithuania
5 November	Law on the Issue of the Currency of the Republic of Lithuania passed by the Supreme Council – Reconstituent Seimas of the Republic of Lithuania Litas Committee formed
29 November	First shipment of the litas banknotes delivered to the Bank of Lithuania
9 December	Resolution on Preparations to Reform the Currency System of the Republic of Lithuania adopted by the Litas Committee
16 December	First foreign currency auctions held at the Bank of Lithuania
1992	
14 February	The Bank of Lithuania regained its gold held at the Bank of France
31 March	The Bank of Lithuania regained its gold held at the Bank of England
1 May	Talonas, the first substitute for the rouble, issued
30 June	Membership of the Bank of Lithuania and its rights as a shareholder of the Bank for International Settlements restored
2 July	Law on Commercial (Joint-Stock) Banks passed by the Supreme Council – Reconstituent Seimas of the Republic of Lithuania
1 September	Commercial functions of the Bank of Lithuania transferred to the State Commercial Bank of Lithuania
16 September	Resolution on Introduction of the Provisional Currency of the Republic of Lithuania, the Talonas and Withdrawing from Circulation the Rouble adopted by the Litas Committee
1 October	Provisional currency, the talonas put into circulation Circulation of the rouble terminated The national currency system established
26 October	First tranche of the IMF stand-by arrangement aimed at the stabilisation of the litas and maintenance of international reserves approved
1993	
30 January	Resolution on the Formation of Convertible Currency Reserve of the Bank of Lithuania adopted by the Government of the Republic of Lithuania and the Board of the Bank of Lithuania
14 June	Resolution on the Introduction of the National Currency of the Republic of Lithuania and Withdrawal of the Provisional Currency (Talonas) from Circulation adopted by the Litas Committee
25 June	Introduction of the litas Banknotes of 10, 20, 50 and 100 litas denomination of 1991 issue, and coins of 1, 2 and 5 litas and 1, 2, 5, 10, 20 and 50 centas denomination put into circulation
20 July	Circulation of the talonas terminated
1 August	Settlements in foreign currencies terminated in the Republic of Lithuania
1 October	The Interbank Currency Exchange started its operations The Bulletin of the Bank of Lithuania first issued

10 December	Banknotes of 5 and 10 litas denomination of 1993 issue put into circulation
1994	
25 January	Banknotes of 2 and 20 litas denomination of 1993 issue put into circulation
1 March	Banknotes of 1 litas denomination of 1994 issue and of 10 litas denomination of 1993 issue put into circulation
17 March	Law on the Credibility of the Litas passed
1 April	Law on the Credibility of the Litas entered into force
1 June	Banknotes of 20 litas denomination of 1991 issue withdraw from circulation
19 July	Auction of Government securities first held at the Bank of Lithuania
1 December	New Law on the Bank of Lithuania passed
21 December	New Law on Commercial Banks passed
1995	
21 February	Law on Credit Unions passed
3 July	Law on the State Investments into Bank Shares passed
20 October	Resolution on Registration of Credit Unions and Associations thereof adopted by the Government of the Republic of Lithuania
21 December	Law on the Insurance of Deposits of Individuals passed Law on Measures to Maintain the Liquidity of Commercial Banks passed
1996	
1 January	Banknotes of 10 and 50 litas denomination of 1991 issue and coins of 1, 2 and 5 centas denomination withdraw from circulation
4 January	Resolution on Taking (Requisitioning) of the Shares of the Joint-Stock Company "Aurabankas" adopted by the Government of the Republic of Lithuania and the Board of the Bank of Lithuania
6 February	Provisional Law on Partial Compensation of Deposits of Individuals Held with Failing Banks passed
